The time period for reply, if any, is set in the attached communication.

Application No. | Applicant(s) | Office Action Summary | 10/581,264 | OGINO ET AL. | Examiner | Art Unit | Robert J. Sandy | 3677 | The MAILING DATE of this communication appears on the cover sheet with the correspondence address -- Reply

		Robert J. Sandy	3677					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address								
Period for Repty A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled softs SIX (6) MONTH'S from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTH'S from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTH'S from the mailing date of this communication. Failure to reply within the set or endended period for reply will by shatted, cause the application to become ARMONED (55 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any earned patter them adjustments. See 37 CFR 17 CMS.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species 1 of figures 1-5 and corresponding to claims 1, 2, and 3 in the reply filed on 07/30/2008 is acknowledged. Therefore, claims 4, 5 and 6 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 07/30/2008.

Specification

The abstract of the disclosure is objected to because:

the phrase/terms "The objective of the current invention" and "A boot-band 30 comprising ..." where "the current invention" and "comprising" are improper for an U. S. Patent abstract: and

the abstract exceeds more than 150 words.

Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation:
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Application/Control Number: 10/581,264

Art Unit: 3677

Extensive mechanical and design details of apparatus should not be given.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phrascology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Drawings

The drawings are objected to because Figures 15, 16, 17, 18 and 19 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 3 is objected to because of the following informalities: Claim 3 contains text between two hyphens which is improper in claim drafting. The hyphens in the phrase "- by cut lines along the longitudinal sides of said engagement-hole formation area – " should be deleted. Appropriate correction is required.

Art Unit: 3677

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 through 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, as to the following:

In claim 1, line 12, there is no antecedent basis for "the first boot-band". For the purpose of this Office action, the "the first boot-band" has been considered as the "first boot-band pawl" having been established in claim 1, line 9.

In claim 3, there is no antecedent basis for "said load-reduction means". For the purpose of this Office action, the "load-reduction means" has been considered as the "pressure-reduction means" established in claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ojima et al. (U. S. Patent No. 5,138,746). Ojima et al. (*746) discloses a boot-band (10) comprising a band body (11) that is wound like a ring around a member (70) to be clamped, and that has an outer-layer portion (22) and an inner-layer portion (21), respectively, at its two ends, with the outer-layer portion being overlaid over the inner-layer portion, engagement holes (30) that are formed in the outer-layer portion, engagement pawls (35) that are formed on, and that protrude outwardly from, the inner-layer portion and that are to be engaged with their corresponding aforementioned engagement holes so that the band body is held in a fastened state, a first bootband pawl (structure at end 13) that is formed on the outer-layer portion nearer to the longitudinally outer end of the band body than are the engagement holes are, a second boot-band

Application/Control Number: 10/581,264

Art Unit: 3677

pawl (50) that is formed on the inner-layer portion and that is to be engaged with the first bootband [pawl] (See Figs. 8 & 10), and a pressure-reduction means (i.e., bottom inner surface portion of outer layer portion) that is formed in the outer-layer portion in such a manner that said pressure-reduction means reduces the pressure applied on the engagement pawls of the innerlayer portion when the outer-layer portion climbs over the engagement pawls just before the first and the second boot-band pawls are engaged; and

(concerning claim 2) said pressure-reduction means has a structure (i.e., the inner surface portion rises up over projections 35) such that the outer-layer portion rises up from the inner-layer portion when the outer-layer portion climbs over the engagement pawls.

Allowable Subject Matter

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Sandy whose telephone number is 571-272-7073. The examiner can normally be reached on M-F (7:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vic Batson can be reached on 571-272-6987. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
